

Digital Tachograph Data Download

BENEFITS

Time Saving

Save time and human resources by scheduling and automating tachograph data downloads.

Compliance with Regulations

Ensure regulatory compliance and avoid large fines.

According to EU regulations, data must be downloaded from tachograph cards regularly:

- For vehicles – at least once every 90 days,
- For drivers – at least once every 28 days.

THE SOLUTION

- ▶▶ Automated download of vehicle tachograph data every 14 days and driver data every 1 day.
- ▶▶ Reports for easy data overview, accounting purposes and payroll calculation.
- ▶▶ Reminders for tachograph calibration dates.
- ▶▶ Ability to integrate with tachograph data analysis platform for violation predictions.

LIVE DISPLAY OF DRIVER DATA

We provide the ability to view the driver's tachograph data Live according to driving regulations.

Data provided:

- Trip driving time.
- Total driving for the day and week, as well as remaining driving hours.
- Remaining 10-hours.
- Start of daily rest.
- Next week's driving forecast.

DRIVER DATA ANALYSIS

Driving, rest, work hours, driver availability at any time.

VEHICLE DATA ANALYSIS

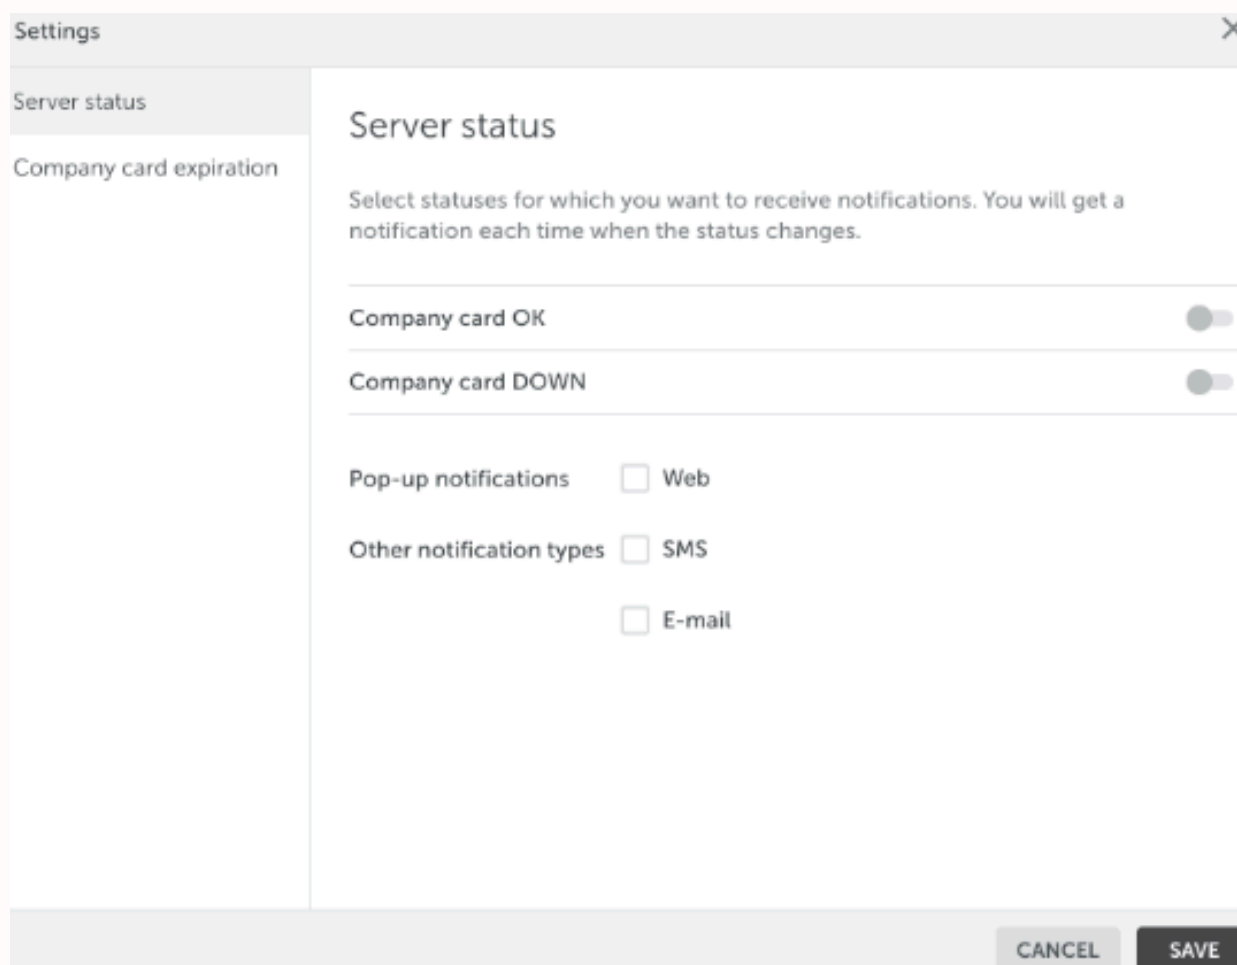

Data regarding how many drivers drove a specific vehicle, their driving times for any selected period.

NOTIFICATIONS

Get notified about important events:

- **Corporate card status** – get notified when the card goes offline and comes back online.
- **Corporate card expiration** – get notified X days before the card expires.

The screenshot shows a 'Settings' window with a sidebar on the left containing 'Server status' and 'Company card expiration'. The 'Server status' section is active, displaying instructions to select notification statuses. It includes two toggle switches for 'Company card OK' and 'Company card DOWN', both of which are currently turned off. Below these, there are checkboxes for 'Pop-up notifications' (with a 'Web' option), 'Other notification types' (with 'SMS' and 'E-mail' options), and a 'SAVE' button at the bottom right.
